

SLOW FISH
CARIBE

The Slow Fish Caribe project promotes the conservation of biodiversity in Caribbean coastal ecosystems and coral reefs, implementing best practices for the sustainable use of food resources in protected areas (Biosphere Reserves - BR). A strong network is growing around the project and already has nodes in Colombia, Costa Rica, Cuba, Grenada, Haiti, Honduras, Mexico and Panama.

slowfishcaribe.slowfood.com

OBJECTIVES

1 To promote traditional knowledge and consolidate the technical and administrative expertise of participating communities inside and outside protected areas in Colombia and Mexico in order to improve the management and use of natural marine and coastal resources and diversify the communities' productive activities in order to reduce the extraction of resources.

2 To increase the economic and social wellbeing of local communities and their commitment to conservation, and to promote sustainable management of marine and coastal zones through the sustainable use of local food resources.

3 To offer access to knowledge, experiences, and results from different intervention models in protected areas and spread best practices in the Caribbean region, beginning with Slow Food's Slow Fish Caribe network.

PROTAGONISTS

The specific beneficiaries of the project will be the artisan fishers and processors of the Seaflower Biosphere Reserve on the islands of San Andrés, Providencia and Santa Catalina (Colombia) and the fishing cooperatives of the Banco Chinchorro and Sian Ka'an Biosphere Reserves (Mexico). Other communities in various Caribbean countries will be involved in the Slow Fish network's activities and exchanges.

PARTNERS

Slow Food is developing the campaign in partnership with the Fundación Activos Culturales Afro (ACUA) and the Corporación para el Desarrollo Sostenible del Archipiélago de San Andrés, Providencia y Santa Catalina (CORALINA) in Colombia, and with the Colectividad Razonatura A.C. and Amigos de Sian Ka'an in Mexico.
